

Updates to our church home

Goal Amount: \$602k

Building Improvement Goals:

- Exterior
 - Paint: We would like to bring a fresh look to the exterior of the building. The colors right now are different tones of brown, gold, hints of pink, and hints of purple. Our hope is that Thrive is a beautiful modern building that the community notices, appreciates and wants to attend.

- Create an indoor/outdoor Colorado experience:
 - Pergola
 - Outdoor Furniture: Create gathering spots for the community to form more naturally.
 - Outdoor Fireplace: A staple piece.
 - Slider Doors: Create an indoor/outdoor vibe to the foyer (upstairs).
 - Accessories: Finishing touches, decor items outside of the building to bring a polished look to the outdoor experience.

Next Generation:

- 2nd - 3rd Grade Room: We would like this room to be engaging and exciting for 2nd - 3rd grade. Right now the walls are quite plain. We hope that when a child peeks inside the classroom they say, "I can't wait to hang out in there!"

- 4th - 5th Grade Room:
 - We would like this room to be engaging, exciting and give a sense of ownership to our preteens. Our hope is that preteens feel a space where they belong and are excited to be in.
 - Slider Doors: Look into bringing slider doors from this room to the outdoor space.
- Downstairs Bathrooms:
 - Replace the tiles, counter, mirror, dividers, and lighting.

A/V/L Auditorium Improvements:

- A refreshed stage design would not only look better for those attending in person but it would greatly improve the experience for our online crowd as well.
- Other A/V/L Improvements:
 - More lighting in the back patio (this is needed for students).
 - Sound improved and connected throughout the inside and outside of the building.

General Building Repairs:

- Roof: The roof leaks over the main auditorium in heavy rain. The shingles need to be replaced.
- HVAC Units: The three main units are limping along and will need to be replaced in the near future.
- Landscaping:
 - On the Lincoln-facing side of the building.
 - Replacing trees (several in the parking lot area need to be replaced).
- Parking Lot Repairs
- Windows Seals: Resealed throughout the building.

Outdoor Activity Area:

- Create a space for sports and activities like volleyball, football, and group games. This would open up opportunities for incredible community especially with our teenagers. This would include leveling an area on the northern side of our property with sod, irrigation, and supplies.
